

SENTINEL AI

Laporan Audit Keamanan Website
Tanggal: 24 June 2026, 19:52 WIB

Security Score	60.0	Grade: D	Risk: HIGH
----------------	------	----------	------------

Ringkasan Eksekutif

Audit keamanan untuk <https://lk21.de> telah selesai dilakukan oleh Sentinel AI. Website mendapatkan Security Score 60.0/100 dengan Grade D. Ditemukan 0 temuan Critical, 45 High, 44 Medium, dan 41 Low. Total 7 rekomendasi perbaikan telah disiapkan.

Metrik	Nilai
Website	https://lk21.de
Total Halaman	1000
Total Endpoint	1023
Durasi Scan	0 detik
Mode Scan	STANDARD
Critical	0
High	45
Medium	44
Low	41

Teknologi Terdeteksi

Teknologi	Kategori	Confidence
Cloudflare	cdn	99%
WordPress	cms	99%
Vue	library	25%

Ringkasan Discovery & Endpoint

Metric	Nilai
Halaman Ditemukan	1000
Form Ditemukan	2928
Endpoint Ditemukan	1022
Aset Ditemukan	38288
Endpoint API	9271

Temuan Keamanan

No	Temuan	Severity	Confidence	OWASP
----	--------	----------	------------	-------

1	Missing Security Headers	MEDIUM	99%	A05:2021
2	Critical Security Headers Missing	HIGH	99%	A05:2021
3	Server Version Disclosure	LOW	98%	A05:2021
4	Broken Access Control	HIGH	75%	A01:2021

125	Missing Security Headers	MEDIUM	99%	A05:2021
126	Critical Security Headers Missing	HIGH	99%	A05:2021
127	Server Version Disclosure	LOW	98%	A05:2021
128	Missing Security Headers	MEDIUM	99%	A05:2021
129	Critical Security Headers Missing	HIGH	99%	A05:2021
130	Server Version Disclosure	LOW	98%	A05:2021

Rekomendasi Perbaikan

1. Tambahkan Security Headers yang Wajib

Prioritas: MEDIUM | **OWASP:** A05:2021 - Security Misconfiguration | **CWE:** CWE-693

Penyebab: Web server tidak mengkonfigurasi HTTP security headers yang direkomendasikan.

Solusi: Tambahkan security headers: X-Frame-Options, X-Content-Type-Options, X-XSS-Protection, Content-Security-Policy, Strict-Transport-Security, dan Referrer-Policy.

2. Headers Keamanan Kritis Tidak Ditemukan

Prioritas: HIGH | **OWASP:** A05:2021 - Security Misconfiguration | **CWE:** CWE-693

Penyebab: Hampir semua HTTP security headers standar tidak dikonfigurasi pada server.

Solusi: Segera konfigurasi semua security headers yang direkomendasikan OWASP. Gunakan tools seperti securityheaders.com untuk verifikasi.

3. Sembunyikan Versi Server

Prioritas: LOW | **OWASP:** A05:2021 - Security Misconfiguration | **CWE:** CWE-200

Penyebab: Header Server mengungkapkan versi web server yang digunakan.

Solusi: Konfigurasi web server untuk menyembunyikan atau mengubah header Server. Di Nginx: server_tokens off; Di Apache: ServerTokens Prod.

4. Perbaiki Kontrol Akses

Prioritas: HIGH | **OWASP:** A01:2021 - Broken Access Control | **CWE:** CWE-284

Penyebab: Halaman atau resource sensitif dapat diakses tanpa autentikasi yang memadai.

Solusi: Implementasikan autentikasi dan otorisasi yang tepat. Gunakan middleware auth pada semua route sensitif.

5. Amankan Endpoint Upload File

Prioritas: MEDIUM | **OWASP:** A04:2021 - Insecure Design | **CWE:** CWE-434

Penyebab: Endpoint upload file memerlukan validasi ketat untuk mencegah upload file berbahaya.

Solusi: Validasi tipe file (whitelist), batasi ukuran, simpan di luar web root, scan dengan antivirus, gunakan nama file acak.

6. Perbaiki Kerentanan Cross-Site Scripting (XSS)

Prioritas: HIGH | OWASP: A03:2021 - Injection | CWE: CWE-79

Penyebab: Aplikasi menampilkan data yang dimasukkan pengguna tanpa encoding atau sanitasi yang tepat.

Solusi: Encode semua output HTML. Gunakan Content Security Policy (CSP). Validasi dan sanitasi semua input. Gunakan library seperti DOMPurify untuk sanitasi sisi klien.

7. Cegah Kebocoran Informasi Sistem

Prioritas: MEDIUM | OWASP: A05:2021 - Security Misconfiguration | CWE: CWE-200

Penyebab: Aplikasi menampilkan informasi detail sistem, stack trace, atau pesan error yang sensitif.

Solusi: Pastikan aplikasi produksi tidak menampilkan informasi debug atau pesan kesalahan detail. Gunakan error handler yang menampilkan halaman kesalahan generik.
