

SENTINEL AI

Laporan Audit Keamanan Website
Tanggal: 24 June 2026, 02:03 WIB

Security Score

58.1

Grade: E

Risk: CRITICAL

Ringkasan Eksekutif

Audit keamanan untuk <https://google.com> telah selesai dilakukan oleh Sentinel AI. Website mendapatkan Security Score 58.1/100 dengan Grade E. Ditemukan 0 temuan Critical, 21 High, 38 Medium, dan 13 Low. Total 7 rekomendasi perbaikan telah disiapkan.

Metrik	Nilai
Website	https://google.com
Total Halaman	15
Total Endpoint	35
Durasi Scan	0 detik
Mode Scan	STANDARD
Critical	0
High	21
Medium	38
Low	13

Ringkasan Discovery & Endpoint

Metric	Nilai
Halaman Ditemukan	15
Form Ditemukan	9
Endpoint Ditemukan	31
Aset Ditemukan	338
Endpoint API	24

Temuan Keamanan

No	Temuan	Severity	Confidence	OWASP
1	Missing Security Headers	MEDIUM	99%	A05:2021
2	Information Disclosure	MEDIUM	78%	A02:2021
3	Server Version Disclosure	LOW	98%	A05:2021
4	Insecure Content Security Policy	MEDIUM	97%	A05:2021
5	Missing Security Headers	MEDIUM	99%	A05:2021
6	Critical Security Headers Missing	HIGH	99%	A05:2021

7	File Upload Endpoint Detected	MEDIUM	90%	A04:2021
8	Missing Security Headers	MEDIUM	99%	A05:2021
9	Critical Security Headers Missing	HIGH	99%	A05:2021
10	Cross-Site Scripting (XSS)	HIGH	85%	A03:2021
11	Cross-Site Scripting (XSS)	HIGH	85%	A03:2021
12	Missing Security Headers	MEDIUM	99%	A05:2021
13	Critical Security Headers Missing	HIGH	99%	A05:2021
14	Missing Security Headers	MEDIUM	99%	A05:2021
15	Critical Security Headers Missing	HIGH	99%	A05:2021
16	Missing Security Headers	MEDIUM	99%	A05:2021
17	Information Disclosure	MEDIUM	78%	A02:2021
18	Server Version Disclosure	LOW	98%	A05:2021
19	Insecure Content Security Policy	MEDIUM	97%	A05:2021
20	Missing Security Headers	MEDIUM	99%	A05:2021
21	Critical Security Headers Missing	HIGH	99%	A05:2021
22	Missing Security Headers	MEDIUM	99%	A05:2021
23	Critical Security Headers Missing	HIGH	99%	A05:2021
24	Missing Security Headers	MEDIUM	99%	A05:2021
25	Critical Security Headers Missing	HIGH	99%	A05:2021
26	Missing Security Headers	MEDIUM	99%	A05:2021
27	Critical Security Headers Missing	HIGH	99%	A05:2021
28	Information Disclosure	MEDIUM	78%	A02:2021
29	Missing Security Headers	MEDIUM	99%	A05:2021
30	Critical Security Headers Missing	HIGH	99%	A05:2021
31	Information Disclosure	MEDIUM	78%	A02:2021
32	Missing Security Headers	MEDIUM	99%	A05:2021
33	Server Version Disclosure	LOW	98%	A05:2021
34	Insecure Content Security Policy	MEDIUM	97%	A05:2021
35	Missing Security Headers	MEDIUM	99%	A05:2021
36	Server Version Disclosure	LOW	98%	A05:2021
37	Insecure Content Security Policy	MEDIUM	97%	A05:2021
38	Missing Security Headers	MEDIUM	99%	A05:2021
39	Critical Security Headers Missing	HIGH	99%	A05:2021
40	Server Version Disclosure	LOW	98%	A05:2021
41	Missing Security Headers	MEDIUM	99%	A05:2021
42	Critical Security Headers Missing	HIGH	99%	A05:2021
43	Server Version Disclosure	LOW	98%	A05:2021
44	Insecure Content Security Policy	MEDIUM	97%	A05:2021
45	Missing Security Headers	MEDIUM	99%	A05:2021

46	Critical Security Headers Missing	HIGH	99%	A05:2021
47	Server Version Disclosure	LOW	98%	A05:2021
48	Insecure Content Security Policy	MEDIUM	97%	A05:2021
49	Missing Security Headers	MEDIUM	99%	A05:2021
50	Critical Security Headers Missing	HIGH	99%	A05:2021
51	Missing Security Headers	MEDIUM	99%	A05:2021
52	Critical Security Headers Missing	HIGH	99%	A05:2021
53	Server Version Disclosure	LOW	98%	A05:2021
54	Insecure Content Security Policy	MEDIUM	97%	A05:2021
55	Missing Security Headers	MEDIUM	99%	A05:2021
56	Critical Security Headers Missing	HIGH	99%	A05:2021
57	Server Version Disclosure	LOW	98%	A05:2021
58	Missing Security Headers	MEDIUM	99%	A05:2021
59	Critical Security Headers Missing	HIGH	99%	A05:2021
60	Server Version Disclosure	LOW	98%	A05:2021
61	Insecure Content Security Policy	MEDIUM	97%	A05:2021
62	Missing Security Headers	MEDIUM	99%	A05:2021
63	Critical Security Headers Missing	HIGH	99%	A05:2021
64	Server Version Disclosure	LOW	98%	A05:2021
65	Cross-Site Scripting (XSS)	HIGH	85%	A03:2021
66	Missing Security Headers	MEDIUM	99%	A05:2021
67	Critical Security Headers Missing	HIGH	99%	A05:2021
68	Server Version Disclosure	LOW	98%	A05:2021
69	Insecure Content Security Policy	MEDIUM	97%	A05:2021
70	Missing Security Headers	MEDIUM	99%	A05:2021
71	Server Version Disclosure	LOW	98%	A05:2021
72	Insecure Content Security Policy	MEDIUM	97%	A05:2021

Rekomendasi Perbaikan

1. Tambahkan Security Headers yang Wajib

Prioritas: MEDIUM | **OWASP:** A05:2021 - Security Misconfiguration | **CWE:** CWE-693

Penyebab: Web server tidak mengkonfigurasi HTTP security headers yang direkomendasikan.

Solusi: Tambahkan security headers: X-Frame-Options, X-Content-Type-Options, X-XSS-Protection, Content-Security-Policy, Strict-Transport-Security, dan Referrer-Policy.

2. Cegah Kebocoran Informasi Sistem

Prioritas: MEDIUM | **OWASP:** A05:2021 - Security Misconfiguration | **CWE:** CWE-200

Penyebab: Aplikasi menampilkan informasi detail sistem, stack trace, atau pesan error yang sensitif.

Solusi: Pastikan aplikasi produksi tidak menampilkan informasi debug atau pesan kesalahan detail. Gunakan error handler yang menampilkan halaman kesalahan generik.

3. Sembunyikan Versi Server

Prioritas: LOW | **OWASP:** A05:2021 - Security Misconfiguration | **CWE:** CWE-200

Penyebab: Header Server mengungkapkan versi web server yang digunakan.

Solusi: Konfigurasi web server untuk menyembunyikan atau mengubah header Server. Di Nginx: `server_tokens off`; Di Apache: `ServerTokens Prod`.

4. Perkuat Content Security Policy

Prioritas: MEDIUM | **OWASP:** A05:2021 - Security Misconfiguration | **CWE:** CWE-1021

Penyebab: CSP mengizinkan 'unsafe-inline' yang melemahkan proteksi XSS.

Solusi: Hapus 'unsafe-inline' dari CSP. Gunakan nonce atau hash untuk script yang diperlukan. Terapkan CSP ketat.

5. Headers Keamanan Kritis Tidak Ditemukan

Prioritas: HIGH | **OWASP:** A05:2021 - Security Misconfiguration | **CWE:** CWE-693

Penyebab: Hampir semua HTTP security headers standar tidak dikonfigurasi pada server.

Solusi: Segera konfigurasi semua security headers yang direkomendasikan OWASP. Gunakan tools seperti securityheaders.com untuk verifikasi.

6. Amankan Endpoint Upload File

Prioritas: MEDIUM | **OWASP:** A04:2021 - Insecure Design | **CWE:** CWE-434

Penyebab: Endpoint upload file memerlukan validasi ketat untuk mencegah upload file berbahaya.

Solusi: Validasi tipe file (whitelist), batasi ukuran, simpan di luar web root, scan dengan antivirus, gunakan nama file acak.

7. Perbaiki Kerentanan Cross-Site Scripting (XSS)

Prioritas: HIGH | **OWASP:** A03:2021 - Injection | **CWE:** CWE-79

Penyebab: Aplikasi menampilkan data yang dimasukkan pengguna tanpa encoding atau sanitasi yang tepat.

Solusi: Encode semua output HTML. Gunakan Content Security Policy (CSP). Validasi dan sanitasi semua input. Gunakan library seperti DOMPurify untuk sanitasi sisi klien.
