

SENTINEL AI

Laporan Audit Keamanan Website
Tanggal: 24 June 2026, 12:25 WIB

Security Score	60.9	Grade: D	Risk: HIGH
----------------	------	----------	------------

Ringkasan Eksekutif

Audit keamanan untuk <https://mototrack.codingbyali.site> telah selesai dilakukan oleh Sentinel AI. Website mendapatkan Security Score 60.9/100 dengan Grade D. Ditemukan 0 temuan Critical, 14 High, 17 Medium, dan 14 Low. Total 5 rekomendasi perbaikan telah disiapkan.

Metrik	Nilai
Website	https://mototrack.codingbyali.site
Total Halaman	3
Total Endpoint	24
Durasi Scan	0 detik
Mode Scan	STANDARD
Critical	0
High	14
Medium	17
Low	14

Teknologi Terdeteksi

Teknologi	Kategori	Confidence
Apache	server	95%
TailwindCSS	library	75%

Ringkasan Discovery & Endpoint

Metric	Nilai
Halaman Ditemukan	3
Form Ditemukan	3
Endpoint Ditemukan	23
Aset Ditemukan	18
Endpoint API	0

Temuan Keamanan

No	Temuan	Severity	Confidence	OWASP
1	Missing Security Headers	MEDIUM	99%	A05:2021

2	Critical Security Headers Missing	HIGH	99%	A05:2021
3	Information Disclosure	MEDIUM	78%	A02:2021
4	Server Version Disclosure	LOW	98%	A05:2021
5	Missing Security Headers	MEDIUM	99%	A05:2021
6	Critical Security Headers Missing	HIGH	99%	A05:2021
7	Server Version Disclosure	LOW	98%	A05:2021
8	File Upload Endpoint Detected	MEDIUM	90%	A04:2021
9	Missing Security Headers	MEDIUM	99%	A05:2021
10	Critical Security Headers Missing	HIGH	99%	A05:2021
11	Server Version Disclosure	LOW	98%	A05:2021
12	Missing Security Headers	MEDIUM	99%	A05:2021
13	Critical Security Headers Missing	HIGH	99%	A05:2021
14	Server Version Disclosure	LOW	98%	A05:2021
15	Missing Security Headers	MEDIUM	99%	A05:2021
16	Critical Security Headers Missing	HIGH	99%	A05:2021
17	Server Version Disclosure	LOW	98%	A05:2021
18	Missing Security Headers	MEDIUM	99%	A05:2021
19	Critical Security Headers Missing	HIGH	99%	A05:2021
20	Server Version Disclosure	LOW	98%	A05:2021
21	Missing Security Headers	MEDIUM	99%	A05:2021
22	Critical Security Headers Missing	HIGH	99%	A05:2021
23	Missing Security Headers	MEDIUM	99%	A05:2021
24	Critical Security Headers Missing	HIGH	99%	A05:2021
25	Server Version Disclosure	LOW	98%	A05:2021
26	Missing Security Headers	MEDIUM	99%	A05:2021
27	Critical Security Headers Missing	HIGH	99%	A05:2021
28	Server Version Disclosure	LOW	98%	A05:2021
29	Server Version Disclosure	LOW	98%	A05:2021
30	Missing Security Headers	MEDIUM	99%	A05:2021
31	Critical Security Headers Missing	HIGH	99%	A05:2021
32	Server Version Disclosure	LOW	98%	A05:2021
33	Information Disclosure	MEDIUM	78%	A02:2021
34	Missing Security Headers	MEDIUM	99%	A05:2021
35	Critical Security Headers Missing	HIGH	99%	A05:2021
36	Server Version Disclosure	LOW	98%	A05:2021
37	Missing Security Headers	MEDIUM	99%	A05:2021
38	Critical Security Headers Missing	HIGH	99%	A05:2021
39	Server Version Disclosure	LOW	98%	A05:2021
40	Missing Security Headers	MEDIUM	99%	A05:2021

41	Critical Security Headers Missing	HIGH	99%	A05:2021
42	Server Version Disclosure	LOW	98%	A05:2021
43	Missing Security Headers	MEDIUM	99%	A05:2021
44	Critical Security Headers Missing	HIGH	99%	A05:2021
45	Server Version Disclosure	LOW	98%	A05:2021

Rekomendasi Perbaikan

1. Tambahkan Security Headers yang Wajib

Prioritas: MEDIUM | **OWASP:** A05:2021 - Security Misconfiguration | **CWE:** CWE-693

Penyebab: Web server tidak mengkonfigurasi HTTP security headers yang direkomendasikan.

Solusi: Tambahkan security headers: X-Frame-Options, X-Content-Type-Options, X-XSS-Protection, Content-Security-Policy, Strict-Transport-Security, dan Referrer-Policy.

2. Headers Keamanan Kritis Tidak Ditemukan

Prioritas: HIGH | **OWASP:** A05:2021 - Security Misconfiguration | **CWE:** CWE-693

Penyebab: Hampir semua HTTP security headers standar tidak dikonfigurasi pada server.

Solusi: Segera konfigurasi semua security headers yang direkomendasikan OWASP. Gunakan tools seperti securityheaders.com untuk verifikasi.

3. Cegah Kebocoran Informasi Sistem

Prioritas: MEDIUM | **OWASP:** A05:2021 - Security Misconfiguration | **CWE:** CWE-200

Penyebab: Aplikasi menampilkan informasi detail sistem, stack trace, atau pesan error yang sensitif.

Solusi: Pastikan aplikasi produksi tidak menampilkan informasi debug atau pesan kesalahan detail. Gunakan error handler yang menampilkan halaman kesalahan generik.

4. Sembunyikan Versi Server

Prioritas: LOW | **OWASP:** A05:2021 - Security Misconfiguration | **CWE:** CWE-200

Penyebab: Header Server mengungkapkan versi web server yang digunakan.

Solusi: Konfigurasi web server untuk menyembunyikan atau mengubah header Server. Di Nginx: server_tokens off; Di Apache: ServerTokens Prod.

5. Amankan Endpoint Upload File

Prioritas: MEDIUM | **OWASP:** A04:2021 - Insecure Design | **CWE:** CWE-434

Penyebab: Endpoint upload file memerlukan validasi ketat untuk mencegah upload file berbahaya.

Solusi: Validasi tipe file (whitelist), batasi ukuran, simpan di luar web root, scan dengan antivirus, gunakan nama file acak.

Top Endpoint Prioritas

URL	Method	Priority
/dashboard	GET	99
